361603, KBR, Elbrus district, s. Elbrus, Lesnaya street, 2.

The results of the survey in selected areas of Karachay-Cherkessia, the Republic of Adygea and the Krasnodar Territory, with the aim to detect and investigate hazardous natural processes and their volume. The data obtained will be further analyzed and used for mapping the actual danger of hazardous natural processes of various types.

Key words: hazardous natural processes, actual hazard, mudflow and flood activity.
